

Bone Restore with Vitamin K2

Highly absorbable nutrients for greater bone density

Item #01727 • 120 capsules

Maintaining bone density is about adding calcium. But calcium must be accompanied by adequate amounts of manganese, zinc, silicon, boron, copper, and vitamin D3, as well as vitamin K, which facilitates the transport of calcium from the bloodstream into the bone.

Certain forms of calcium are not well-absorbed by your body. That's why Bone Restore is formulated to give you 700 mg of three different forms of highly absorbable calcium, plus magnesium oxide.

Bone Restore also delivers a potent dose of other microelements like *boron* and *silicon* that enable calcium and magnesium to be incorporated into the bone matrix, helping to boost healthy bone density. It also features a highly absorbable boron/fructose/carbohydrate complex called **FruiteX B® OsteoBoron®** to support healthy joints.

This formulation delivers the MK-7 form of vitamin K2 as well, which is up to 10 times more bioavailable than K1. This form remains biologically active in the body over a sustained 24-hour period and to even higher levels (seven-to-eightfold) during prolonged intake.

Adding Bone Restore with Vitamin K2 to your whole-body health regimen is a great way to get all of these critical bone-health nutrients in a single, convenient formula!

This product is also available without Vitamin K2 (MK-7).

Bone Restore

Item #01726 • 120 capsules

CAUTION: If you are taking anti-coagulant or anti-platelet medications, or have a bleeding disorder, consult your healthcare provider before taking this product.

FruiteX B® and OsteoBoron® are registered trademarks of VDF Futureceuticals, Inc. U.S. Patent No. 5,962,049. DimaCal® and TRAACS® are registered trademarks of Albion Laboratories, Inc. Malate is covered by U.S. Patent 6,706,904 and patents pending.

Note: Those who take Once-Daily Health Booster (formerly Super Booster) or Super K usually do not need additional vitamin K2. They should order **Bone Restore without** vitamin K2. Those taking the anti-coagulant drug Coumadin® (warfarin) should use **Bone Restore without** vitamin K2.

Four capsules contain:

Vitamin D3 (as cholecalciferol)	1,000 IU
Vitamin K2 (as menaquinone-7)	200 mcg
Calcium (as DimaCal® dicalcium malate, ... TRAACS® calcium (bisglycinate chelate, calcium fructoborate)	700 mg
Magnesium (as magnesium oxide)	300 mg
Zinc (as zinc amino acid chelate)	2 mg
Manganese (as manganese amino acid chelate)	1 mg
Silicon [from horsetail extract (herb)]	5 mg
Boron (calcium fructoborate as patented FruiteX B® OsteoBoron®)	3 mg

Other ingredients: vegetable cellulose (capsule), vegetable stearate, maltodextrin, dicalcium phosphate, corn starch.

Dosage and use

- Take four capsules daily, or as recommended by a healthcare practitioner. Scientific studies suggest calcium supplementation in divided doses with food in the morning and evening may yield the best results. Maintaining an optimal vitamin D blood level also helps maximize calcium absorption.
