

DNA Protection Formula

*Focused nutritional support
for healthy DNA*

Item #02270 • 30 vegetarian capsules

Support your body's natural defenses against environmental toxins with Life Extension's updated **DNA Protection Formula**, now with **XanthoVital®** (xanthohumol).

Xanthohumol is a hops flavonoid shown to support DNA function. Our DNA Protection Formula also provides watercress extract, chlorophyllin, and zinc to provide additional DNA support.

Chlorophyllin protects against cell-damaging free radicals.¹⁻³ It binds and forms irreversible complexes with certain chemicals, allowing the body to safely eliminate them before they can enter the bloodstream.^{4,5} Chlorophyllin also supports defenses against toxins binding to DNA and promotes expression of the protective p53 gene, which partially controls cell reproduction.

Watercress is a leafy green cruciferous vegetable with many health benefits, including helping to protect DNA health. Help protect your DNA ... with our reformulated DNA Protection Formula!
