

## Eye Pressure Support with Mirtogenol®

*Supports Eye Comfort and Vision Health*

**Item #01514 • 30 vegetarian capsules**

As you grow older, the fluid contained within the chambers of your eyes may gradually and *unnoticeably* increase. This has been shown to contribute to a host of unwanted age-related vision issues encountered by *millions* of aging Americans.

In a significant scientific advance, researchers have found that a proprietary blend widely available in Europe called **Mirtogenol®** may effectively *support* eye pressure already within healthy range as you age.<sup>1</sup>

### Two Potent Nutrients in One Innovative Formula

At the core of **Mirtogenol®**'s eye health-promoting power are two standardized, proprietary *phytonutrient* (plant-based) compounds: **Mirtoselect®** European bilberry extract and **Pycnogenol®** French Maritime Pine bark extract. In a 2010 human study, Mirtogenol® induced up to a **24%** reduction in already-healthy eye pressure.<sup>1</sup>

Extracts of French Maritime Pine bark and bilberry have long been shown to promote healthy blood flow in multiple areas of the body.<sup>2-6</sup> The new **Eye Pressure Support with Mirtogenol®** formula may support healthy blood flow within the tiny vessels (**microvasculature**) of your eyes, helping to promote healthy fluid pressure inside the ocular chamber.

A daily serving of just one vegetarian capsule of **Life Extension®**'s new **Eye Pressure Support** formula contains **120 mg** of **Mirtogenol®**, delivering optimal amounts of both Mirtoselect® European bilberry fruit extract and Pycnogenol® dried French Maritime pine extract.
