

Fast-Acting Joint Formula

Don't let soreness slow you down!

Item #00965 • 30 capsules

Joint stiffness and discomfort can stand in the way of even simple everyday tasks. Fast-Acting Joint Formula provides three innovative ingredients that can offer joint support in days, instead of the weeks or months it can take with supplements like *Glucosamine* and *Methylsulfonylmethane* (MSM). This innovative formula includes three unique ingredients that work together to help inhibit inflammatory factors, lubricate joints, and support the growth of healthy joint tissue.

Scientists have identified several innovative compounds that work via multiple mechanisms to provide safe, effective, fast-acting support for aging joints. These novel compounds are combined in Fast-Acting Joint Formula, a one-per-day formulation designed to promote joint comfort and ease of motion in days, rather than weeks or months. The recommended daily dose of one capsule supplies:

- **300 mg** of *solubilized keratin*, a bioactive form of *keratin* protein that supplies cysteine and other high-sulfur precursors needed to quickly rebuild vital joint tissue. *Solubilized keratin* helps to regulate pro-inflammatory mediators like *prostaglandin E2* that are associated with joint degradation, while increasing the activity of antioxidants such as superoxide dismutase and glutathione that shield joints against free-radical assault.

- **200 mg** of *Decursinol-50*®, a fast-acting fluid regulating compound derived from the herb Korean Angelica (*Angelica gigas Nakai*). *Decursinol-50*® goes to work immediately, acting on the central nervous system while inhibiting activation of *nuclear factor-kappa B* (NF-κB), a DNA transcription factor associated with inflammation.

- **40 mg** of *Hyal-Joint*®, a unique, patented form of *hyaluronic acid* that increases the viscosity of the synovial fluid that cushions joint cartilage. Like premium motor oil for your car's engine, *Hyal-Joint*® protects against normal joint wear and tear, supplying a patented blend of hyaluronic acid, collagen, and other glycosaminoglycans to lubricate joints and help support the growth of healthy joint tissue.

Fast-Acting Joint Formula is highly effective when used alone. For maximum, broad-spectrum protection against the multiple factors that degrade joints, Fast-Acting Joint Formula can be used with other joint-support formulas such as ArthroMax® with Theaflavins & AprèsFlex®.

One capsule contains:

Hyal-Joint® [Hyaluronic Acid 40 mg
(sodium hyaluronate), collagen, and
glycosaminoglycan complex]

Decursinol-50® (*Angelica gigas Nakai*) ... 200 mg
extract root) [std. to 0.1% decursinol
(0.2 mg)]

Cynatine® FLX (providing solubilized 300 mg
keratin)

Other ingredients: gelatin, microcrystalline
cellulose, vegetable stearate, silica.

Dosage and use

- Take one capsule daily with or without food, or as recommended by a healthcare practitioner. Two capsules can be taken if needed until desired effect is obtained, then take one capsule daily thereafter. May provide added benefit when taken with ArthroMax or other joint support formulas.
