

Optimized Saffron with Satiereal®

Helps Support Appetite Control

Item #01432 • 60 vegetarian capsules

People who struggle with weight loss often point to several “Achilles’ heels” that **sabotage their efforts** to keep off the pounds: *eating between meals, grazing at night, and a constant desire to snack* are among the most common.

The *fantastic news* is that a proprietary extract of **saffron**, called **Satiereal®**, has been *clinically shown* to deal with nearly all of the above issues. In fact, women involved in **Satiereal®** studies experienced the following **amazing** results:^{1,2}

- 100% reduction in the desire to snack
- 55% fewer instances of eating between meals
- Less hunger
- Moderate weight loss
- More energy
- Better mood

Say goodbye to “kitchen raids” and say hello to **Optimized Saffron with Satiereal®**.

This supplement should be taken in conjunction with a healthy diet and regular exercise program. Results may vary.

Satiereal® is a registered trademark of INORÉAL. International patents pending. The fact that Satiereal® induced significant reductions (100%) in the desire to snack, but with only moderate weight loss, is further support for the multi-pronged approach needed to effectively manage weight that has long been espoused by Life Extension®.
