

## Shade Factor™

*Safeguard your skin from the inside out*

**Item #01938 • 120 vegetarian capsules**

At last, a skin supplement made to support healthy skin before, during, and after you spend time outdoors. As we age, even moderate ultraviolet exposure takes its toll on skin health. Shade Factor™ is an oral supplement that uses unique ingredients to support the body's natural immune response to UV exposure: Red Orange Complex®, Nicotinamide, and *Polypodium leucotomos* extract.<sup>1-5</sup>

Together, they promote healthy DNA function and the production of ATP, the body's main source of cellular energy — both of which can be affected by UV exposure. By encouraging the body's natural response to UV exposure, Shade Factor™ helps support and revitalize your skin at the cellular level. So try Shade Factor™ today ... and safeguard your skin from the inside out.

**This product is not a substitute for topical sunscreens.**

Red Orange Complex® is a registered trademark of Bionap S.r.l.
