

Shade Factor

Skin-nourishing supplement for those who love the outdoors

Item #01938 • 120 vegetarian capsules

At last, a skin health supplement made specifically for those of us who love the great outdoors. Shade Factor is an oral supplement formulated with three unique ingredients to help support healthy skin during daytime activities: Red Orange Complex®, Nicotinamide, and *Polypodium leucotomos* extract.

As we age, even moderate ultraviolet exposure takes its toll on skin health.¹⁻⁸ Shade Factor works by supporting the body's natural, healthy immune response to UV exposure. This unique formula promotes healthy DNA function and the production of ATP, the body's main source of cellular energy — both natural biological processes which can be affected by UV exposure.

By encouraging the body's natural response to daylight, Shade Factor helps nourish and revitalize your body's entire surface — and unlike lotions and sprays, Shade Factor cannot be washed off by water or sweat. So try Shade Factor today ... and nourish all of your skin!

Caution: This product is not a substitute for topical sunscreens. Gastric disturbances may occur. Consult with your healthcare provider before taking this product if you have gout or liver disease.

Red Orange Complex® is a registered trademark of Bionap S.r.l.
