

Tear Support with MaquiBright®

Promote tear production from the inside out

Item #01918 • 60 mg • 30 vegetarian capsules

A common problem affecting people as they age is the onset of eye discomfort. In addition, environmental factors, computer use, and contact lenses also increase the chances of dry, irritated, itchy eyes.¹⁻⁴

Tear Support with MaquiBright® is a unique *oral* supplement that supports eye health from the inside out for systemic, continuous comfort.

Instead of repeatedly adding artificial tears in the form of drops throughout the day, you can now take one vegetarian capsule in the morning to help support eye health for an entire day!⁵ Tear Support with MaquiBright® **supports your body's natural** mechanisms to promote production of your own *natural* tears.

The secret lies in this proprietary **maqui berry extract's** supply of compounds called *delphinidins*, which support natural defenses against chemical and light stimulation and ultraviolet (UV) light.⁵ In one study, healthy volunteers taking **60 mg** of this extract daily experienced a **45%** increase in tear production.⁶

Tear Support with MaquiBright® helps your eyes feel and look their best.
